2. What emerging issues of concern do you have relating to agriculture and the food system, and/or natural resources and the environment?
  - a. What solutions are you aware of to address these issues?
  - b. What barriers do you see to achieving these solutions?
3. What infrastructure or business support do you feel is needed to support viable, sustainable farming in our community?
4. If you could create a local funding pool to be accessed only for your community, what conservation practices would you want funded? What geographic region would you like to see focus in?
5. If you could pass one law or create one program to support farmers in Vermont, what would it be?
